Brand New Book ***** Print on Demand *****.Excerpt from In the Heart of the Rockies: A Story of Adventure in Colorado Until comparatively lately that portion of the United States in which I have laid this story was wholly unexplored. The marvellous canons of the Colorado River extend through a country absolutely bare and waterless, and save the tales told by a few hunters or gold-seekers who, pressed by Indians, made the descent of some of them, but little was known regarding this region. It was not until 1869 that a thorough exploration of the canons was made by a government expedition under the command of Major Powell. This expedition passed through the whole of the canons, from those high up on the Green River to the point where the Colorado issues out on to the plains. Four years were occupied by the party in making a detailed survey of the course of the main river and its tributaries. These explorations took place some eight or nine years after the date of my story. The country in which the Big Wind River has its source, and the mountain chains contained in it, were almost unknown until, after the completion of the railway to California, the United States government was forced to send an expedition into it to punish the Indians for their raids upon settlers in the plains.
