To download **Bulletin of the Philosophical Society of Washington Volume 14** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with BULLETIN OF THE PHILOSOPHICAL SOCIETY OF WASHINGTON VOLUME 14 ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .any other celestial body: Star s hour-angle = L. M. T. + R. A. Mean Sun--R. A. Star. With this hour-angle and the two including sides of the astronomical triangle, viz., the assumed co-latitude of the observer and the known polar distance or co-declination of the observed celestial body, the opposite side of the triangle, which is the zenith distance or co-altitude of the celestial body, is computed from the formula): in which x = an auxiliary angle, t = the hour-angle, L = the latitude, d = the declination, and z = the zenith distance; and the true bearing, or angle opposite the side of the astronomical triangle representing the polar distance, is computed from the formula: $\sin Az. = \sin t \cos d \operatorname{cosec} z$ (2). There are superior qualities attached to this method of finding the Sumner line, because it may be used in any circumstances so long as the altitude of the observed celestial body does not greatly exceed 80, and the results obtained have been demonstrated to possess an enhanced probability of accuracy. The present purpose, however, is not to discuss these advantages which have been expounded by writers upon the subject of the new navigation, but to disclose a short and simple process of finding the zenith distance and azimuth without the aid of the extended computations indicated by the formulae just referred to, and so to provide for the practice of a method of finding the line of position and the...
