American Psychiatric Association Publishing, United States, 2003. Paperback. Book Condition: New. 3rd abridged edition. 250 x 178 mm. Language: English . Brand New Book. The explosive growth in the neurosciences that prompted the 2002 publication of the timely fourth edition of The American Psychiatric Publishing Textbook of Neuropsychiatry and Clinical Neurosciences continues unabated. To make this vital information more accessible to residents and practitioners alike, the editors have created a unique Essentials volume based on that acclaimed textbook. Like the tremendously successful fourth edition, this abridged version stands out because of its impressive clinical utility and practicality and because of the singular expertise of its preeminent chapter authors. With 20 chapters written by 46 of today's leading clinicians and researchers in neuropsychiatry, this concise reference focuses on the key principles of diagnosis and treatment of patients with neuropsychiatric disorders. Like its parent textbook, it includes -An extensively revised and expanded chapter on the neuropsychiatric aspects of delirium - An ambitious (and new to the fourth edition of the Textbook) section about the clinical relevance of drug-induced delirium -A detailed, in-depth index This volume begins with assessment (bedside neuropsychiatry, evaluation, clinical and functional imaging), and continues through symptomatologies (delirium, aphasia, memory and amnesia), disorders (traumatic brain injury; seizure, sleep, and cerebrovascular disorders; brain tumors; ethanol and other chemical dependencies; Alzheimer's disease and other dementing illnesses; schizophrenia; mood and affective disorders; anxiety disorders; and disorders of childhood and adolescence), and treatments (psychopharmacologic, cognitive, and behavioral). Remarkably relevant and practical, this Essentials volume in clinical neurosciences joins an elite group of textbooks that comprise...
